

# Work From Home with Peplink

Balance 310X

## What are your remote working challenges?

Build a secure, flexible, and easily accessible network in your organization with Peplink's solution today, so your employees can seamlessly adapt to a world that's constantly changing.

UBR LTE

MAX Transit Duo

MAX BR1 Mini

### Secure connectivity

- Employees cannot access the HQ's resources without a secure VPN connection. e.g., company server, authorized software, and documents etc.
- Setting up VPN infrastructure is time-consuming and expensive.

### Remote location

- Many remote workers are facing communication problems.
- The existing home network speed is insufficient.
- Waiting to reconnect again if the line goes down.

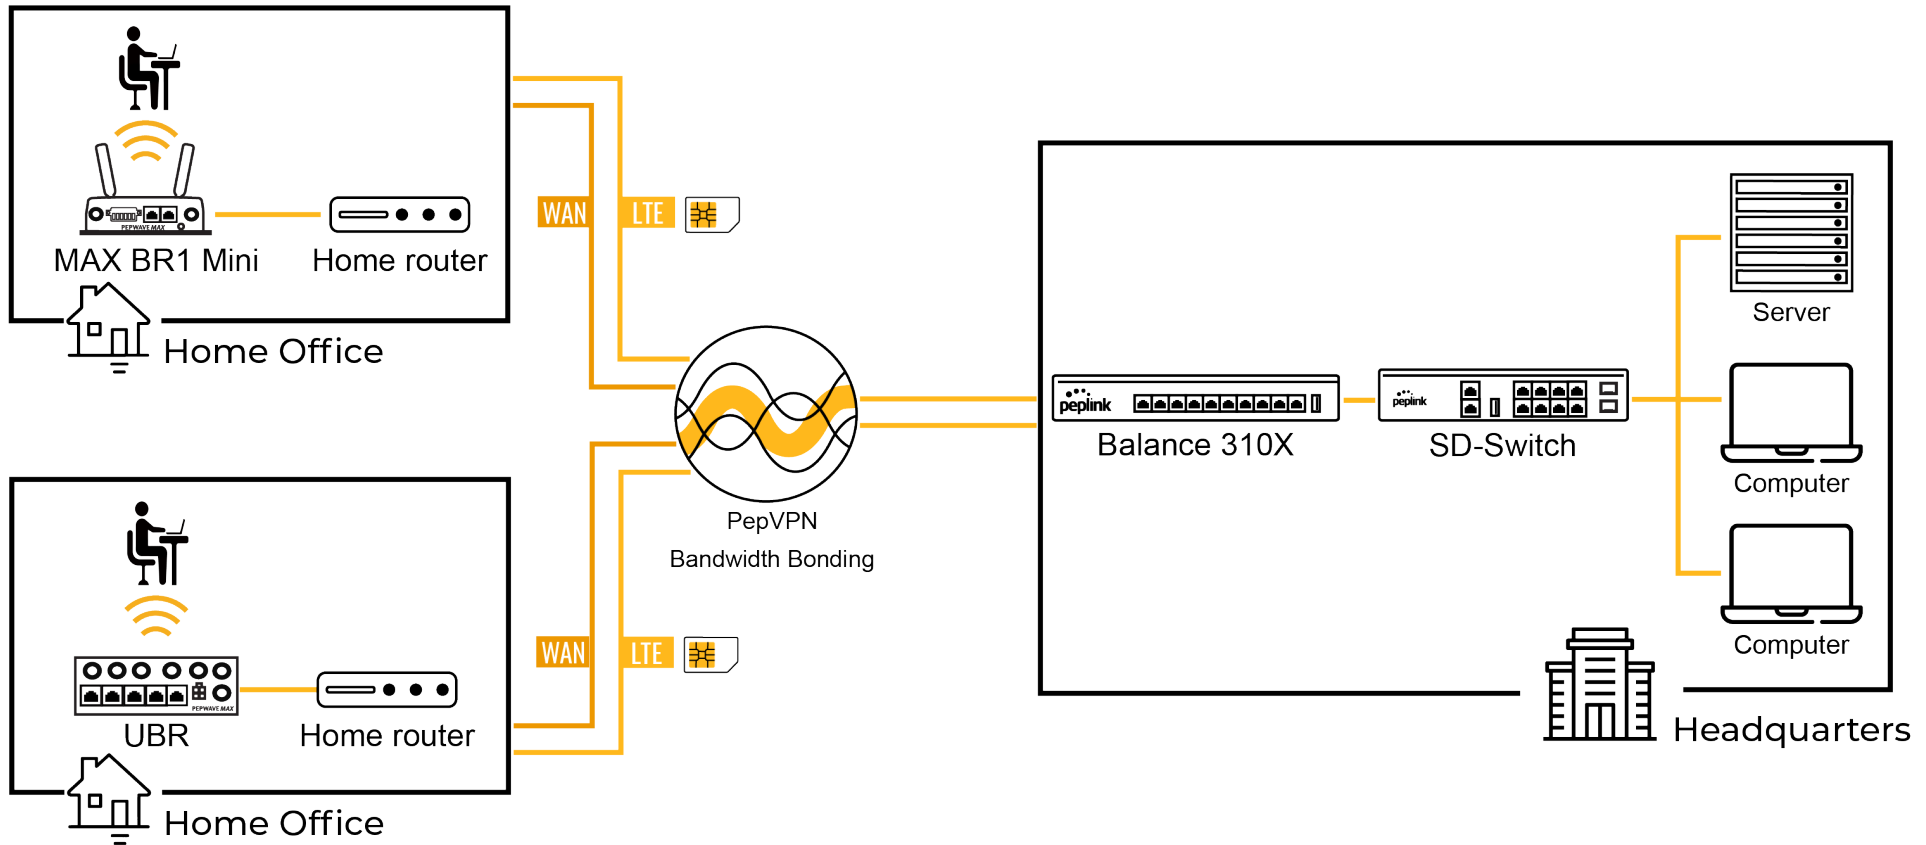

### Inconsistent connection

- When your line becomes unstable, packet-loss and jitter occur during a video conference.
- Bad impression will be presented to your client.

## Remote Access

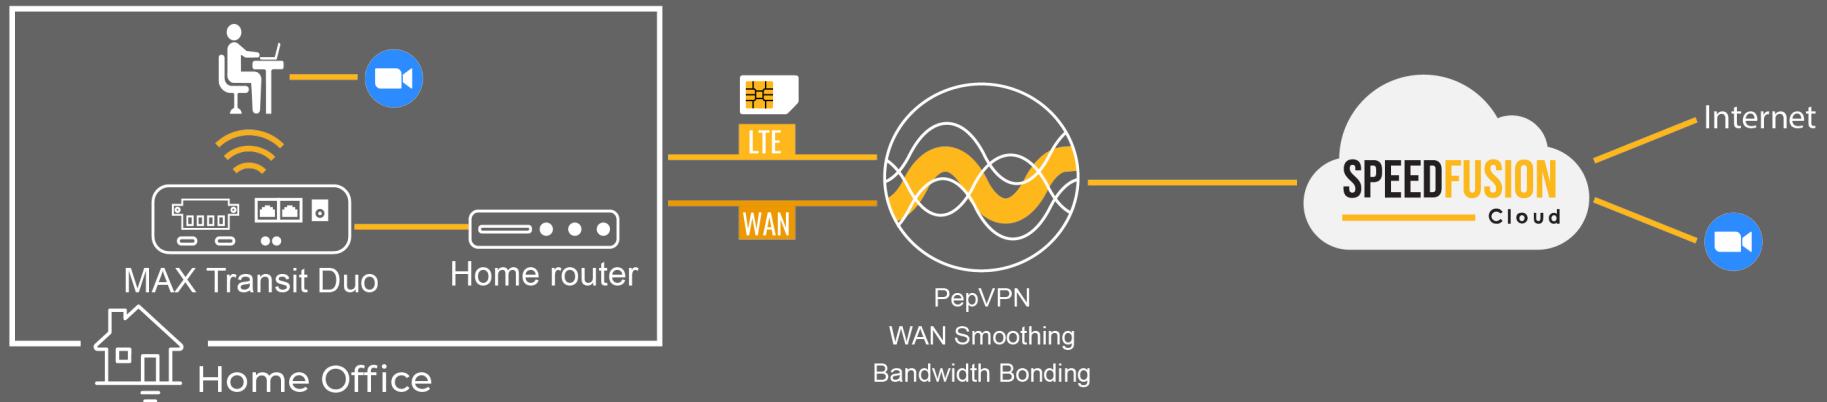

WAN= Home Cable

Provide a secure **SpeedFusion VPN** tunnel for remote workers to access the Headquarters' network. SpeedFusion technology such as **Bandwidth Bonding** technology can combine the bandwidths of multiple links.

## Remote Collaboration

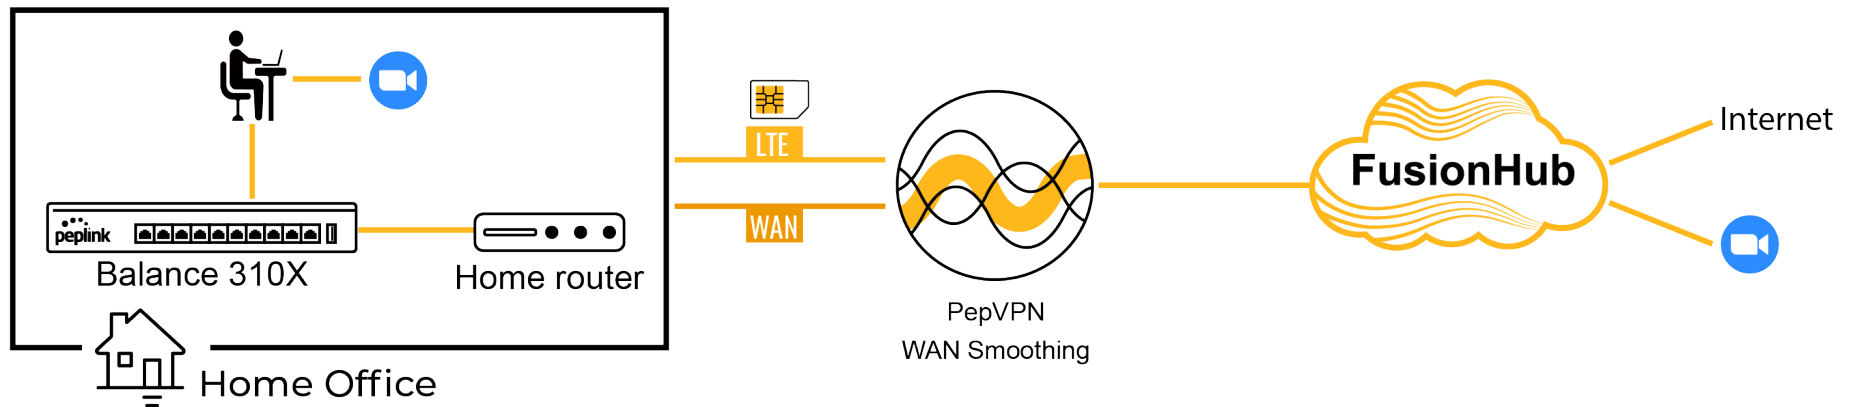

WAN=Home Cable

Various Peplink routers allow the use of cellular connections alongside your home network. Pair your device with **SpeedFusion Cloud** to create an unbreakable SpeedFusion tunnel, providing SpeedFusion technology such as **WAN Smoothing** to give smooth and jitter-free video calls.

## Live Streaming

WAN=Home Cable

Bandwidth heavy applications like online webinars require stable and uninterrupted connectivity. Use a Peplink router and live-stream directly to a **FusionHub** virtual server to enable **WAN Smoothing**, which proactively combats packet loss.

HOW IT WORKS

## Most Popular

### MAX BR1 Mini

- The best single cellular router
- Use a LTE connection for reliability
- With Wi-Fi functionality
- SpeedFusion technology

## Our Top Pick

### MAX Transit Duo

- Dual cellular multi-WAN router
- 802.11ac dual-band Wi-Fi
- PrimeCare option available
- SpeedFusion technology

Find Your Perfect Match For Every Budget
